

Zyntra Enterprise

Packaging, feature boundary, and recommended pricing.

EXPLAINABLE DECISIONS. ACCOUNTABLE EXECUTION.

COMMUNITY

Free for evaluation and non-production use under the Zyvora Production License v1.0: the decision engine (gaps, explainable what-if with ranges, ranked plan, constraints), industry packs with file, HTTP and webhook sources, the console, quorum approvals with OIDC and change windows, signed decision records with outcome checks, and Gravia, webhook and file executors.

ENTERPRISE

Production rights plus multi-cluster decision control, SAML and SCIM via Haven, auto-approve policy, durable decision history and scorecards, learned edge weights, ITSM and paging connectors, certified packs and releases, and accountable support.

COMMERCIAL RECOMMENDATION

- Sell Zyntra Enterprise as an annual subscription priced by managed clusters and KPI graphs. A shop or a plant line on a pack is one KPI graph.
- Do not charge by user, KPI sample, API call, action executed, or dashboard seat.
- Keep the existing capabilities in Community. Do not restrict the current repository.
- Lead with a paid production pilot on one cluster and credit it against year one on conversion.
- Bundle with Netra, Gravia, and Fabric Keep as the Zyvora decision loop; sell packs on their own where there is no Zyvora estate.

ZYNTRA
ENTERPRISE
RECOMMENDED ENTRY

INR 24 lakh / USD 29,000
PER YEAR

Up to 10 managed clusters and 25 KPI graphs, unlimited users. Includes 24×7 P1 support with a one-hour response target.

Scope basis: Zyntra v0.4.0-dev (v0.3 decision engine plus Phase A packs), reviewed 2 October 2026. This proposal keeps all current functionality in Community.

Paid capabilities worth building

Enterprise operations around the existing decision engine and packs. Community stays intact.

CAPABILITY	CUSTOMER VALUE	LAUNCH PACKAGE
Multi-cluster decisions	One plan across clusters and sites, with gaps rolled up by owner and service.	Cluster registration, per-cluster KPI graphs, cross-cluster plan, and delegated views.
Enterprise identity	Go beyond OIDC: provisioning and approval rights scoped by team.	SAML and SCIM via Haven, RBAC by team, cluster, pack, and action risk.
Auto-approve policy	Let proven low-risk actions flow and keep high-risk ones gated.	Per-action auto-approve gated on outcome hit rate, window and invariants; blast-radius limits; Kairo risk input.
Decision history	Prove what was decided, by whom, and whether it worked, for years.	Durable proposal and audit store, per-action and per-pack scorecards, SIEM export, and retention tiers.
Learned weights	Models that improve with every executed action.	Edge weights fitted from history with confidence intervals, drift flags, and reviewable updates.
Managed connectors	Put Zyntra decisions into the tools teams already run.	ServiceNow, Jira, PagerDuty, Slack, and Teams; Fleet and Relay executors; certified industry packs.
Certified delivery	Reduce production and upgrade risk.	Signed artifacts, SBOM, CVE advisories, compatibility matrix, LTS channel, and offline bundles.
Accountable support	An escalation path and help modelling the KPI graph.	SLAs, KPI model reviews, upgrade guidance, incident assistance, and TAM options.

DO NOT MOVE OUT OF COMMUNITY

- KPI graph, gaps, what-if with ranges, plan, and pairs
 - Packs, file/HTTP/webhook/manual sources, owner views
 - Live Netra, Gravia, Fabric, and Keep signals
 - Grounded AI digest, ask, anomalies, and forecasts
- OIDC, roles, two-person approval, change windows
 - Signed decision records, outcome checks, predicted vs actual
 - Gravia, webhook, and file executors, dry-run by default
 - Fabric Keep brokered execution and signed executor agent

Annual subscription

Use the cluster or KPI graph limit reached first. Unlimited users and approvers are included.

EDITION	ANNUAL PRICE	CAPACITY	SUPPORT	BEST FIT
Community	Free (non-production)	Unlimited non-production clusters; single deployment	Community	Labs, evaluation, and testing
Enterprise Essentials	INR 9 lakh / USD 11k	2 clusters; 5 KPI graphs	8×5; next business day	First production decision loop
Enterprise	INR 24 lakh / USD 29k	10 clusters; 25 KPI graphs	24×7 P1; 1 hour	Platform and SRE teams across sites
Enterprise Scale	INR 48 lakh / USD 58k	40 clusters; 100 KPI graphs	24×7 P1; 30 min + TAM	Large GPU estates and critical services
Sovereign / MSP	INR 1 crore / USD 120k+	Custom	Mission-critical	Air-gapped, sovereign, and service providers

LAUNCH OFFER

PILOT

Paid production pilot

INR 4-8 lakh / USD 5k-10k

90 days; 1 cluster and 3 KPI graphs. Credit 100% to year one if signed within 60 days.

FOUNDING

Founding Enterprise customer

INR 19 lakh / USD 23k

Up to 10 clusters and 25 KPI graphs. KPI model workshop included. Two-year price protection. First three approved reference customers.

SUITE

Zyvor decision loop

Quoted bundle

Zyntra with Netra, Gravia, and Fabric Keep on one order form and one support contract.

COMMERCIAL TERMS

- Annual subscriptions are prepaid.
- Three-year prepaid commitment: 10% discount. Five-year prepaid commitment: 15% discount.
- GST, withholding, travel, cloud consumption, and third-party licences (including model inference) are extra.
- Expansion is quoted before capacity is exceeded. Avoid surprise metered bills.
- Community is licensed under the Zyvor Production License v1.0: free for evaluation and non-production use. Production use needs a commercial license, and Enterprise modules use a Zyvor commercial EULA.

Services stay separate

Keep modelling and integration work separate from recurring subscription revenue.

SERVICE	RECOMMENDED PRICE	SCOPE
KPI model workshop	INR 2-4 lakh / USD 2.5k-5k	Map the KPIs, owners, targets, dependencies, and candidate actions into a first graph.
Production pilot	INR 4-8 lakh / USD 5k-10k	1 cluster and 3 KPI graphs for 90 days, with success criteria.
Standard implementation	INR 5-12 lakh / USD 6k-15k	Install, connect Zyvor products or business exports and APIs, executors, identity, and handover.
Air-gapped setup	INR 8 lakh / USD 10k + 20%	Offline bundle, local model gateway, and controlled updates. Annual premium on the subscription.
Pack or custom adapter	INR 2-8 lakh / USD 2.5k-10k	One industry pack fitted to the customer's exports, or a new source kind or executor.
Training	INR 1.5-3 lakh / USD 1.8k-3.6k	Remote cohort on modelling, approvals, and operating runbooks.

SUPPORT RESPONSE TARGETS

SEVERITY	ESSENTIALS	ENTERPRISE	SCALE	COMMITMENT
P1 Critical	4 business hours	1 hour, 24×7	30 minutes, 24×7	Continuous engagement until stabilized
P2 High	1 business day	4 hours	2 hours	Business hours or contracted coverage
P3 Normal	2 business days	1 business day	8 business hours	Targeted remediation plan
P4 Request	5 business days	3 business days	2 business days	Guidance or roadmap response

Commit to response and active engagement. Do not promise guaranteed resolution times.

Ship what you can support

The commercial proposal should reflect what is actually ready to operate and support.

NOW: COMMUNITY

Decision engine with ranges, pairs and constraints, the shop pack and generic sources, OIDC and quorum approvals, signed decision records, Gravia, webhook and file executors, Keep execution.

ENTERPRISE V1

Multi-cluster plan, SAML/SCIM via Haven, auto-approve policy, durable decision history and scorecards, ITSM connectors, certified packs (shop, plant, GPU), certified build pipeline, and support operations.

POST-GA

Learned edge weights, second-wave packs, MSP multi-tenancy, and white-label after technical and commercial demand is proven.

RELEASE GATES BEFORE THE FIRST ENTERPRISE CONTRACT

- Define Community and Enterprise build provenance and commercial licence enforcement under the Zyvor Production License.
- Publish a support matrix for Kubernetes versions, Netra, Gravia, Fabric and Keep releases, model gateways, and supported packs.
- Create signed release artifacts, SBOMs, a CVE response policy, upgrade/rollback procedures, and an enterprise release channel.
- Verify Keep brokered execution end to end on the reference lab, including sandbox egress to the broker.
- Establish support intake, severity definitions, on-call ownership, escalation paths, and customer communication templates.
- Attach a module availability schedule to every proposal. Do not contract learned weights or MSP tenancy before they are deliverable.

RECOMMENDED CUSTOMER JOURNEY

01

Workshop

Pick a pack, first KPI graph, success criteria.

02

Paid pilot

One cluster or pack, real data, approvals in dry-run.

03

Subscription

Production rights, executors in apply, and support.

04

Expansion

More clusters, KPI graphs, and connectors.
